Final Year Project

FET FYP CONNECT (Final Year Project Process Automation System)

This project is a web-based application that automates the manual and time-consuming process of managing Final Year Projects at the Faculty of Engineering and Technology (University of Sindh). It connects faculty members and students, enabling online submission and storage of proposals, submission of thesis, and tracking of progress of FYP Group. The system includes features for supervisors to review and provide feedback on proposals, and for coordinators to manage the overall process.
